

New Product Press Release

Stradivarius Acetone Vapor Smoother

Close More Fortus Deals With Smooth Parts

Many an FDM sale is lost to the “layered look”. Savvy competitors know this and skillfully exploit the layered appearance to steal your sale.

Wide spread competition from numerous sources makes selling Fortus FDM machines more challenging than ever. The technical merits of the technology should sell the machine but the decision to buy is often made before the client fully understands the pros and cons of 3D printing technology.

The Stradivarius Vapor Polisher Solves The Problem.

It's a professional tool for finishing FDM parts that makes the layered look disappear. Modestly priced and easy to use everyone should have one.

- Improve part appearance
- Bond layers for improved strength
- Build with thicker layers for better productivity

Call us today to order an evaluation machine.

You'll be amazed by the results.

Stradivarius Vapor Polisher Terms and Conditions

Stradivarius re-sellers and distributors will be evaluated and approved on a case by case basis.

Sales territories will not be restricted and exclusivity is not offered.

All re-sellers will operate as independent entities and not as agents of Insight Instrument Corp.

Insight may cancel a distributor or re-sellers privileges at any time by notification in writing via fax, email or text.

Product Pricing

All vapor polishers are manufactured and shipped from Fort Erie Ontario Canada.

They enter the US duty free under the NAFTA free trade agreement as Canadian made goods.

They may be subject to state or local taxes.

Stradivarius dealers fit into one of two categories:

Resellers

After the initial purchase of three machines the re-seller has no obligation to stock product, maintain a demo machine, or even ship the product.

We will drop ship the product directly to their customer only on a prepaid basis.

The reseller is obligated to support their customer.

Distributors

A distributor is required to maintain a demo machine for customer evaluation and sales demos.

A distributor is required to maintain a minimum inventory of one machine in addition to the demo unit so orders may be shipped promptly from stock.

A distributor is required to purchase machines in minimum lots of six on a prepaid basis.

We will ship directly to the distributor or drop ship on their behalf directly to their customer.

The distributor is obligated to support their customer.

Private Labeling

A distributor may order product without Stradivarius brand labeling to private label the product with their own brand. Private labels require prior approval.

Sales and Marketing Information

Insight will provide sales and marketing photos and information for use by re-sellers and distributors.

This data will facilitate web and print advertising and offered with permission to use but remains the property of Insight. Permission will be granted upon inspection and approval of each use.
